

Report on One Day Training by Keysight Technologies at Chandigarh

One day training program was held by M/s.Keysight Technologies on 17th October,2014 at Chandigarh. The training program was to acquaint the participants with the new instrumentation and control systems developed by M/s. Keysight Technologies (formerly M/s. Agmatel India). New digital CRO with better range and PC compatibility were showcased and the trainees were made to have a handson session on these devices. Different types of network analyzers were also shown with their utility for various applications explained. It was also shown that how similar products could be upgraded to newer versions. Session was devoted to communication systems and power meters wherein P-Series ,EPM series power meters were shown. Different waveform generators with their practical applications were also demonstrated. A session explaining the DGS&D rate contract for M/s. Keysight's products was also held. The training would be useful in measurements and control & Instrumentation Lab.
