

TOUR REPORT

I have attended 4th international conference on Materials Processing and Characterization from 14 – 15 March, 2015. I left the institute on 12.03.2015 at 6.00 p.m. and reported back the institute on 16.03.2015. The conference was organized by ELSEVIER (International Publisher) and proceedings of the conference has been published in Materials Today. The conference was attended by more than 200 participants and was a wonderful experience to present my research work at a international platform.

(Dr. Rupinder Singh)
Professor (Prod.)
