

POST OF RESEARCH ASSOCIATE (RA) / SRF for TEQIP-III SPONSORED PROJECT

Project Title: Process optimization of upgraded Bio-chemical treatment for excess sludge minimization from high strength industrial wastewater

Duration: 10 months (extendable to 01 year) Post	Qualification	Fellowship (Rs.)
Research Associate	Ph.D or equivalent degree or having three years of research, teaching, and design & development experience after M.Tech/M.E./M.Sc. in Civil Engg./Chemical Engg./Chemistry with atleast one research paper in Science Citation Indexed (SCI) journal in the relevant area of the research. A candidate having appropriate research experience and publications in the field of industrial wastewater treatment shall be preferred.	47,000/- p.m.
SRF	M.Tech/M.E./M.Sc in Civil Engg./Chemical Engg./Chemistry with two years of research experience in relevant area after acquiring minimum qualifications.	35,000/- p.m.

Responsibilities:

1. To perform process and operational design verification, experimentation and data collection
2. To write research papers
3. To maintain project related documentation
