

Report

I attended the short term course on Advanced Data Analytics in Management organized by Department of Management Studies held at IIT, Delhi from June 26-28, 2015. Around 50 participants attended this program. I found this course to be very useful. This program served as platform for me to interact with other coming from other part of the country.

The following topics were covered in this program: - Regression, Multi-regression, Correlation, Factor analysis, Confirmatory factor analysis, Data envelopment analysis, Time series analysis etc.
