

REPORT

I attended the short term course (STC) on Computational Methods in Engineering organized by Department of Civil Engineering, National Institute of Technology, Hamirpur funded by TEQIP-II from May, 13-17, 2013. It was an interdisciplinary course. The following topics were covered during this five day course – Finite Difference Method (FDM), Finite Element Method (FEM), Finite Volume, Spatial Analysis, ANN, Genetic Algorithm, Fuzzy Logic and Optimization Techniques. This course served as platform for me to interact with other academicians and researchers from different parts of the country.
