

REPORT

The 101st Indian Science Congress organised by University of Jammu, Jammu and The Indian Science Congress Association, Kolkata was held in University of Jammu, Jammu from February, 3-7, 2014.

The annual Indian Science Congress was held this year with theme “Innovations in Science & Technology for Inclusive Development”. The event was inaugurated on 3rd February, 2014 by Dr. Manmohan Singh, Prime Minister of India. International experts along with National luminaries from different streams of Science and Technology participated in this congress. As many as 8000 delegates including Nobel laureates, senior scientists, teachers, young scholars and students participated and presented their research findings. The five day event included the Inaugural Session, Plenary Lectures, Women Science Congress, Children Science Congress, Science Exhibition, Science Communicators Meet, Rural Innovators Exhibition and Fourteen Parallel Sectional Presentations.

I participated and presented the paper which was titled “Energy Conservation by DMAIC Approach – A Case Study in a Milk Plant” in the engineering session on Wednesday, February 05, 2014 from 4.00 PM to 5.45 PM. The session was chaired by Dr. P. K. Raychaudhuri, from Petroleum Conservation Research Association (PCRA), Eastern Region, Kolkata. There were five more presenters in the session. All gave presentation for 15 minutes and five minutes were kept for discussion.

I thank TEQIP-II cell for funding my visit.
