Note: Students are required to get the matter as per above guidelines printed in Times New Roman font on flex sheet of size 2.6ft (width) x 3.6ft (Length). The flex background has to be white and the text printing has to be in blue. No Project display shall be allowed without flex.

Eyes On You

Abhik Sehgal (1706544)

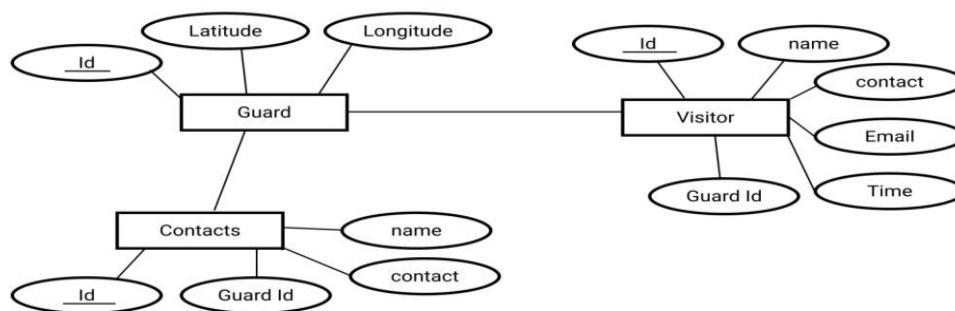

Upinder Singh (1606784)

Objectives:

1. To develop an application for determining the geographical position of a specific person.
2. To keep the records of all the visitors entering the specific space.
3. To add the facility to limit the usage of visitor's operations.
4. To develop a QR generator and it should be able to store the visitor's data.

Project Description:

Eyes On You is an app which is specially designed for determining the accurate position of any person working in any organization, keeping the record of the visitors visiting any organization as well as it can be used for taking care of the blind and deaf people along with senior citizens. The app will be able to scan a unique QR code which will be scanned by the security personnel to store his personal information in the database. Also, an admin can observe the exact geographical location of an employee and he can target a fix geographical location which can be observed with the red circle pointer. Using this proposed application, whenever an employee will cross that specified area he/she will not be able to use some of the features of android phone according to the kiosk app set by admin as per their requirements.

Applications:

- Taking care of the blind and deaf people along with senior citizens.
- Determining the accurate position of persons working or visiting any organization.
- Capability of restricting some of the features of android phone.
