

Report on International Conference on Production and Industrial Engineering (CPIE-2013)

I have attended the CPIE-2013 on March 30, 2013. The conference was scheduled from March 29, 2013 to March 31, 2013. This is the third time CPIE-2013 was held at NIT, Jalandhar. On that day, I presented one research paper titled “Evaluation of Thermal Power Plants of Punjab using Multi Attribute Decision Making Approach” and chaired one session on the topic “Advanced Operations Management”. I have attended two more sessions also. It was very nice experience to interact the professionals, academicians and researchers during the whole day.
