

REPORT:-

International Conference on Modern Trends in Science, Engineering and Technology 2013 (ICMTSET 2013), was a premier event that addressed the new advancements and challenges in the field of Science (Mathematics), Engineering and Technology. This Multidisciplinary Conference was held in **Ambassador Hotel, Al Fahidi St., Dubai, U.A.E** during 25th and 26th of September, 2013. ICMTSET 2013 aim was to provide an opportunistic forum and vibrant platform for researchers and industry practitioners to share their original research work and practical development experiences on specific new challenges and emerging issues. Attending a conference was a professionally rewarding experience. In addition to socializing with colleagues from other institutions and a trip to a possibly exotic locale, the two main reasons to attend a conference were to hear presentations and to converse with other researchers. Listening to presentations informed me of what others are doing, sometimes more clearly than the paper and in any event with a slightly different spin and the ability to ask questions, which inspire research ideas of me, and exposed me to different styles of presentation. After attending the conference what I learns that even though listening to the talks is extremely valuable, hallway conversations were even more fruitful.
