## Module 4: Analysis of Frame Structures (06)

### Lecture 1: Stiffness of Truss Members(Page: 1-6)

4.1.1 Introduction

4.1.2 Element Stiffness of a Truss Member

4.1.3 Member Stiffness with Varying Cross Section

4.1.4 Generalized Stiffness Matrix of a Plane Truss Member

### Lecture 2: Analysis of Truss(Page: 7-14)

4.2.1 Element Stiffness of a 3 Node Truss Member

4.2.2 Worked Out Example

### Lecture 3: Stiffness of Beam Members(Page: 15-21)

4.3.1 Introduction

4.3.2 Derivation of Shape Function

4.3.3 Derivation of Element Stiffness Matrix

4.3.4 Generalized Stiffness Matrix of a Beam Member

### Lecture 4: Finite Element Analysis of Continuous Beam(Page: 22-30)

4.4.1 Equivalent Loading on Beam Member

4.4.1.1 Varying Load

4.4.1.2 Concentrated Load

4.4.2 Worked Out Example

### Lecture 5: Plane Frame Analysis(Page: 31-38)

4.5.1 Introduction

4.5.2 Member Stiffness Matrix

4.5.3 Generalized Stiffness Matrix

4.5.4 Worked Out Example

## **Lecture 6 Analysis of Grid and Space Frame(Page: 38-48)**

**4.6.1 Introduction**

**4.6.2 Member Stiffness Matrix**

**4.6.3 Generalized Stiffness Matrix**

**4.6.4 Worked Out Example**

**4.6.5 Analysis of Space Frame**
