

Content

Module 7: Additional Applications of FEM (03)

Lecture 1: Finite Elements for Elastic Stability(Page: 1-8)

- 7.1.1 Introduction**
- 7.1.2 Buckling of Truss Members**
- 7.1.3 Buckling of Beam-Column Members**
- 7.1.4 Buckling of Plate Bending Elements**

Lecture 2: Finite Elements in Fluid Mechanics(Page: 9-15)

- 7.2.1 Governing Fluid Equations**
- 7.2.2 Finite Element Formulation**
 - 7.2.2.1 Displacement based finite element formulation**
 - 7.2.2.2 Pressure based finite element formulation**
- 7.2.3 Finite Element Formulation of Infinite Reservoir**

Lecture 3: Dynamic Analysis(Page: 16-23)

- 7.3.1 Hamilton's Principle**
- 7.3.2 Finite Element Form in MDOF System**
- 7.3.3 Solid Body with Distributed Mass**
 - 7.3.3.1 Mass matrix for truss element**
 - 7.3.3.2 Mass matrix for beam element**
 - 7.3.3.3 Mass matrix for plane frame element**
 - 7.3.3.4 Mass matrix for space frame element**
- 7.3.4 Time History Analysis**
